

## Careers with a Future

Agriculture and natural resources today reach far beyond ranching and farming. It's science and technology at its best. Everything from bioengineering to robotics and lasers help create the business we call AGRICULTURE. Other industries like food and fiber production, manufacturing and marketing, finance, and the retailing and service industries combine to make the agricultural sector the largest employer in the United States.

Faculty advisors, career fairs, internships, placement activities, student organizations, and judging teams allow you to learn more about career options, and each serves as an opportunity to develop leadership and personal skills that will lead to success. Each year, graduates enter a wide range of career fields that they enjoy and excel in because of the education and opportunities that were presented to them while in college. Personal experience in scouting, 4-H or FFA, honor societies, judging teams, and internships, as well as an optimum education have allowed individuals to find their career or continue their education through medical school, law school, or graduate school at universities across the country.

## Academic Programs

- Agribusiness/Agricultural Economics
- Agricultural Communications
- Agricultural Engineering
- Agricultural Leadership
- Agricultural Mechanization
- Agricultural Science
- Agricultural Systems Management
- Agronomy
- Animal Science/Dairy Science
- Biochemistry
- Bioenvironmental Sciences
- Entomology
- Equine Industry and Business
- Food Science and Technology
- Forestry
- Genetics
- Horticulture
- Landscape Architecture
- Nutritional Sciences
- Plant, Soil and Environmental Science
- Poultry Science
- Rangeland Ecology and Management
- Recreation, Park and Tourism Sciences
- Teacher Certification
- Wildlife and Fisheries Sciences

# Exploring new Possibilities

What are your interests - ecology and the environment, biological sciences, technology, or business? Maybe you just know that you like the outdoors or animals or electronics or science experiments or working with people. Perhaps you already have a career in mind: physician, forester, veterinarian, food technologist, urban landscape designer, researcher, real estate broker, banker, or production engineer. Whether you're undecided or have a specific goal, the junior colleges, colleges, and universities of agriculture in Texas are places to explore strengths and interests, discover potential careers, and build your future.

## Call Today!

*For more information on a career in agriculture, contact one of the following universities:*

**Abilene Christian University**

915-674-2401

**Angelo State University**

915-942-2027
